SKILLS

Languages & Technical Skills: MERN Stack (JavaScript, React, Node.js, MongoDB), Java, HTML5, CSS, Python, WordPress, SQL, SQLite, Bootstrap, PHP, RESTful APIs, Selenium
Tools: Jira, GitHub, MySQL, Visual Studio Code, Android Studio, Anthropic Claude, Zoho Desk

EXPERIENCE

Ole Mexican Foods Norcross, Georgia
Full Stack Developer ***March 2025 – Present***

- Built an internal asset tracking web platform using JavaScript, PHP, SQL, HTML, and CSS, integrated with GP ERP and Wizard WMS to provide real-time visibility of display assets across warehouses and supermarkets with cross functionality for Android & iOS versions
- Designed, developed, and maintained an internal SMS web app using the Twilio API, giving leadership and human resources their first solution for broadcasting mass communications to reach employees across all company subsidiaries
- Developed internal dashboards using Bootstrap, PHP, JavaScript, and jQuery, giving leadership company-wide visibility into customer orders, delivery drivers, and sales data in one centralized location
- Performed quality assurance testing on Android, iOS, and web applications to ensure zero downtime for field sales teams relying on proprietary tools
- Designed and deployed WordPress websites for 5 subsidiary brands to establish their online presence and provide access to careers landing page, resulting in each site ranking as the top Google search result and generating 400+ monthly visitors
- Administered backend systems across two company servers managing product delivery driver profiles and order processing; provided technical support for 900+ users, diagnosing and resolving hardware/software issues across proprietary mobile and web applications

Outlier Remote
Tier 1 Coder (Contract) ***October 2024 – March 2025***

- Trained AI LLM models to improve code generation capabilities by solving complex coding challenges, writing code in Python and Java, evaluating generated code quality to optimize performance and accuracy resulting in model's improvement in code generation
- Developed comprehensive test cases for solutions generated via AI LLM, testing their code output for functionality and reliability

Georgia Gwinnett College Lawrenceville, Georgia
Web Developer Intern (Next Generation Focus) ***January 2024 – July 2024***

- Implemented a PDF generation functionality to a React based website enabling the seamless mapping of user data to PDF templates, significantly streamlining the customer documentation process for administrators of non-profit organization
- Identified and resolved numerous CSS and HTML formatting errors, enhancing the website's responsiveness and consistency across mobile and desktop devices, leading to an improved user experience
- Oversaw the deployment of record-keeping web site using Render ensuring proper functionality for users

Technology Ambassador Program Intern ***January 2023 – May 2023***

- Designed and developed educational Java game resulting in a 60% increase in student interest in IT measured through student surveys
- Led 3 Java workshops within Georgia Gwinnett College and the Atlanta Science Festival which intended to engage and teach the fundamentals of programming

Frontline Help Desk Technician ***June 2022 – August 2023***

- Resolved 1000+ total email, call, and in-person incident tickets in a timely manner using Solarwinds (ticketing application) and modifying, merging, commenting, and setting up appointments for technicians to diagnose and solve technical issues on campus
- Led the deployment of over 600+ desktops, laptops, and mobile devices across campus for both staff and student users
- Utilized enterprise applications such as Microsoft Teams to communicate with staff members and Microsoft Azure to look up user statuses, reset MFA, and private credentials

EDUCATION

Microsoft Certified: Azure Developer Associate (AZ-204) ***In Progress***
GEORGIA GWINNETT COLLEGE Lawrenceville, Georgia
Bachelor of Science in **Information Technology, Software Development Concentration** **Graduated** ***August 2024***
VALENCIA COLLEGE Orlando, Florida
Associate of Arts in **General Studies** **Graduated** ***May 2021***

PROJECTS

Backend Developer for ***Memory Lane*** Social Journaling Web App https://github.com/Team-Forget-Me-Not/Forget-Me-Not
Stack Used*:* • React • JavaScript • Node.js • FireBase
Testing Lead for ***QuicKart*** Grocery Shopping Android App https://github.com/ctbernard/QuicKart-RapidCode-Innovators
Stack Used*:* • React Native • JavaScript • Jest • MongoDB
Developer for ***Fruit Rain*** Educational Programming Game https://github.com/ChloeVed/FruitRain-Folder
Stack Used: • Java • Processing • JavaFX
